let's make it work.

Plastribution website 'Our products' user guide

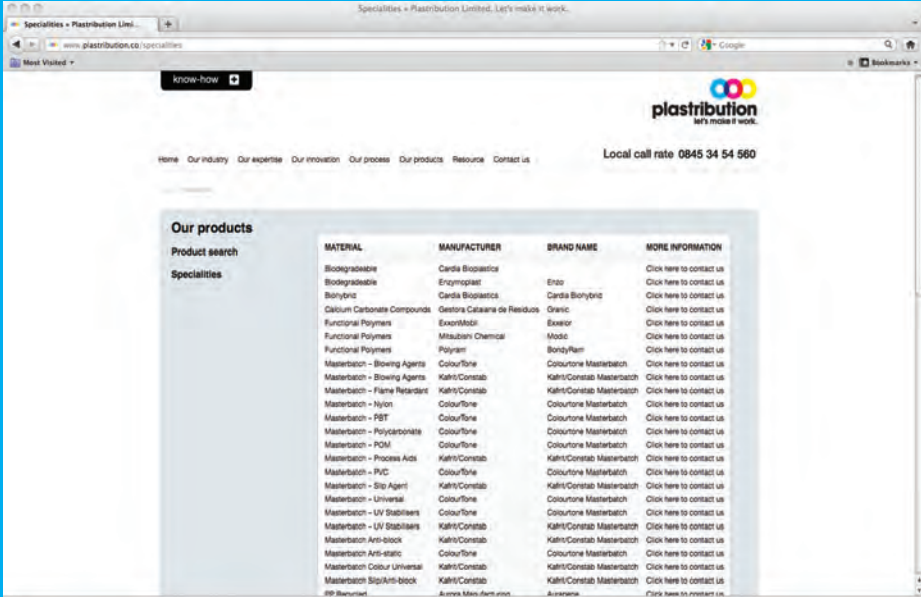

1. Using your web browser enter the address www.plastribution.co.uk and select 'Our products' from the menu bar.

2. Click the tab and there is the option to visit the 'Specialities' section to review our range of functional polymers, masterbatches, and specialist additives.

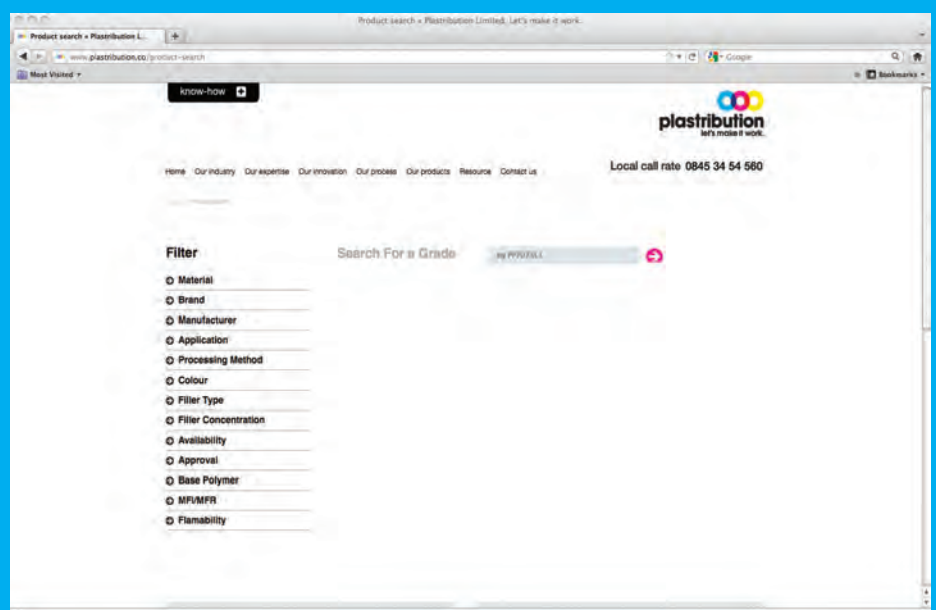

3. Within '**Specialities**' you can select materials by either **brand name**, **manufacturer**, or **material**, and from there raise an enquiry.

4. The '**Product search**' page lists all the materials that Plastribution distributes that are contained within the IDES database, and this information is updated on a weekly basis.

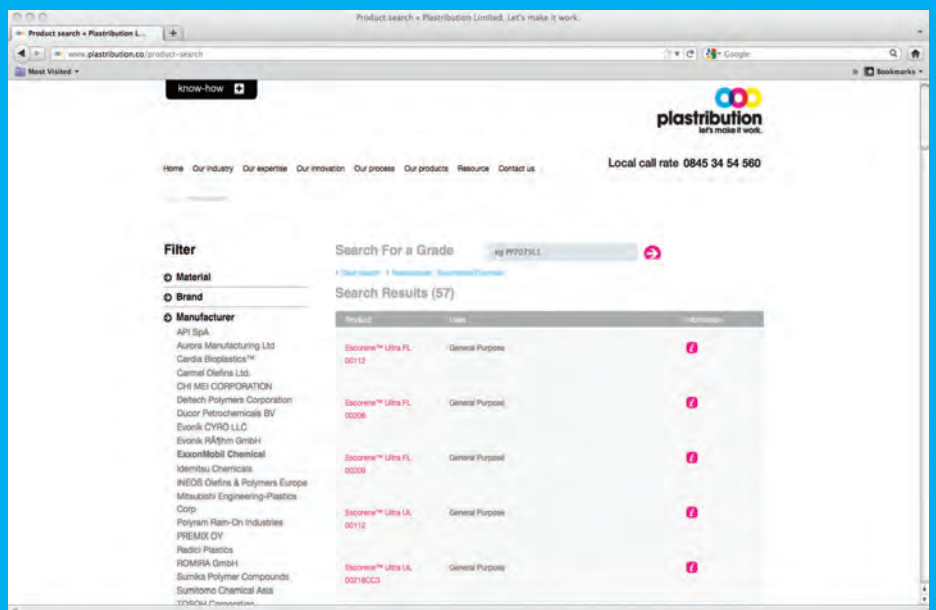

There is a whole range of search options, but if you can't find what you are looking for please either call us on **0845 34 54 560**, or send us an enquiry and we will be pleased to assist you to find what you are looking for.

5. If you are looking for a specific grade just start typing the grade reference in the 'Search for a Grade' box and as you type the choice narrows and when you see the grade you want just click on it!

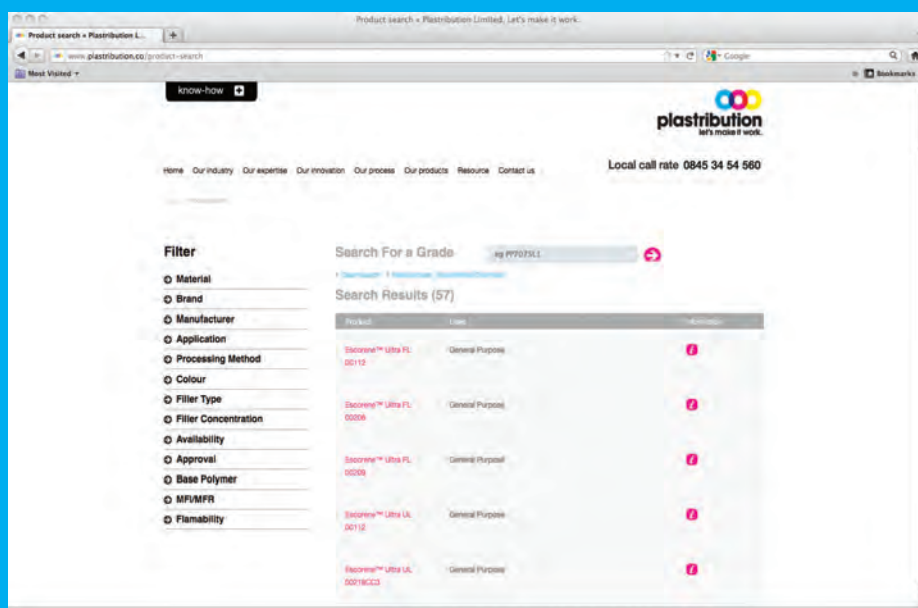

6. If you want to search by the 'Filter' just make the selections you want and the list is automatically filtered.

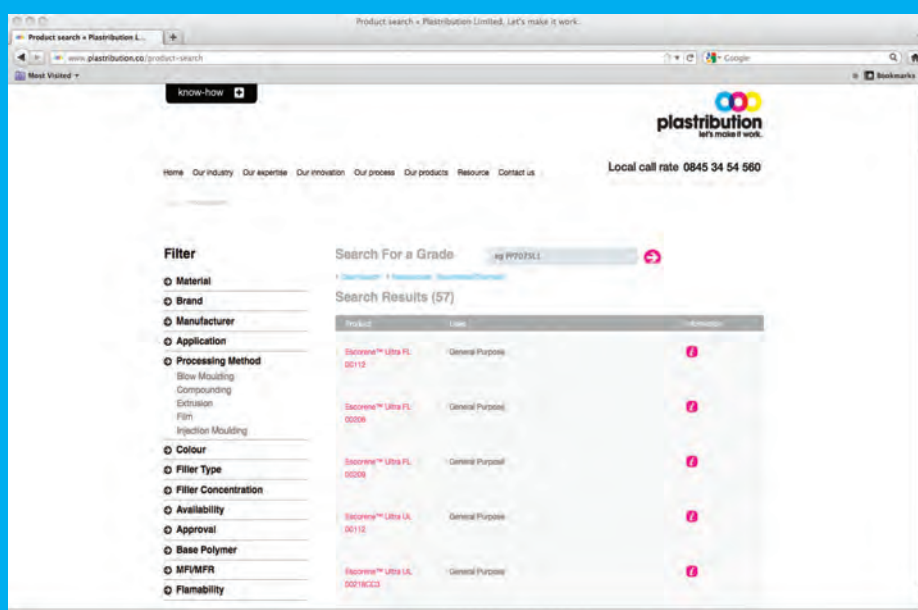

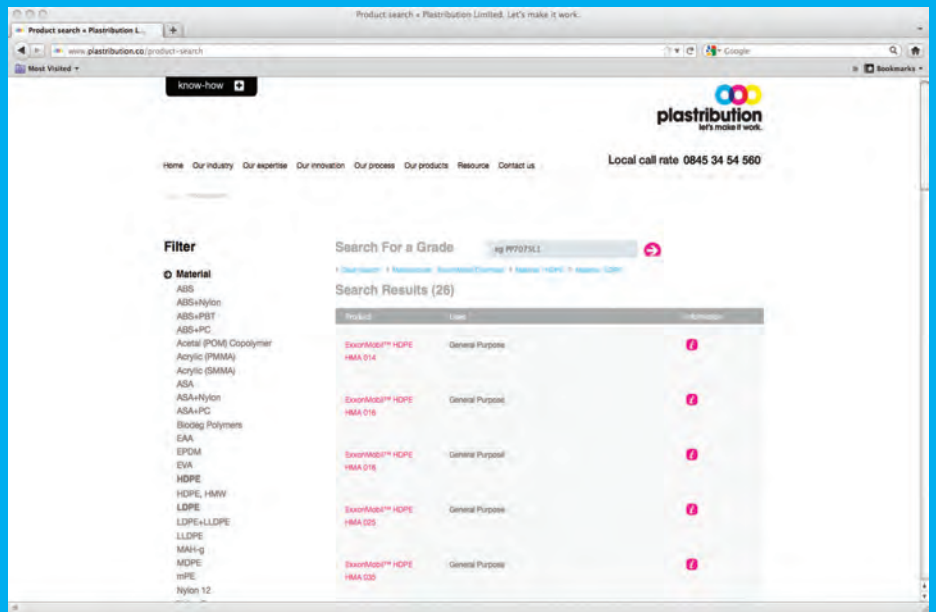

- The list automatically collapses after you have made a selection.

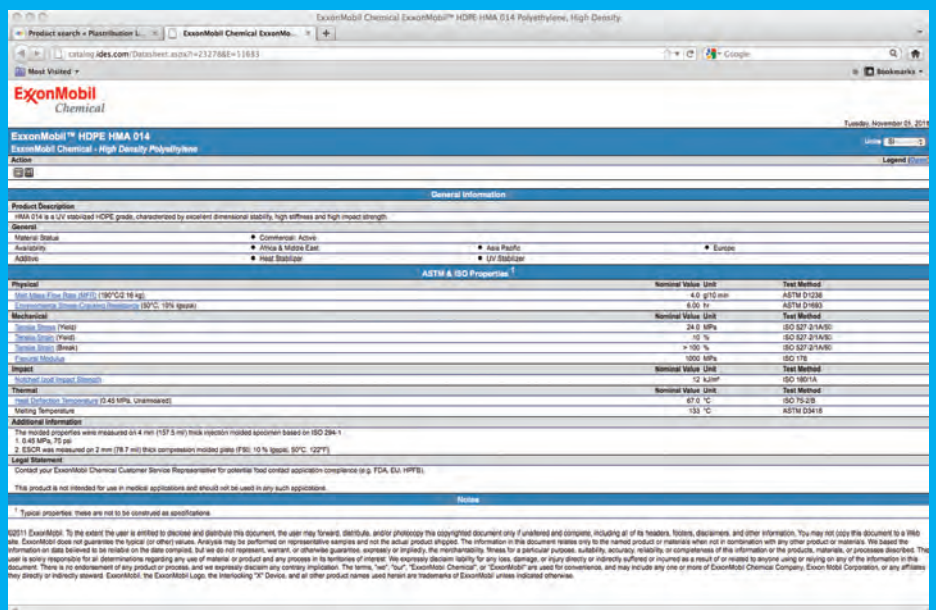

- Make further selections to narrow your search.

9. You can reopen 'Filter' to make multiple selections, or delete selections as required. Hover over a description and more information appears in a balloon.

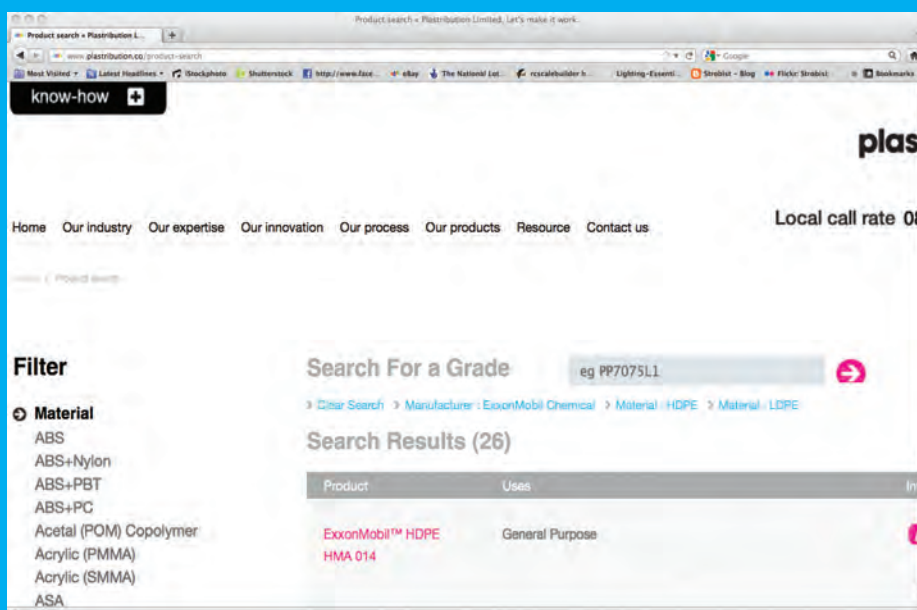

10. Click the  button and you can view the datasheet in a separate browser window enabling you to simultaneously view detailed information for multiple grades.

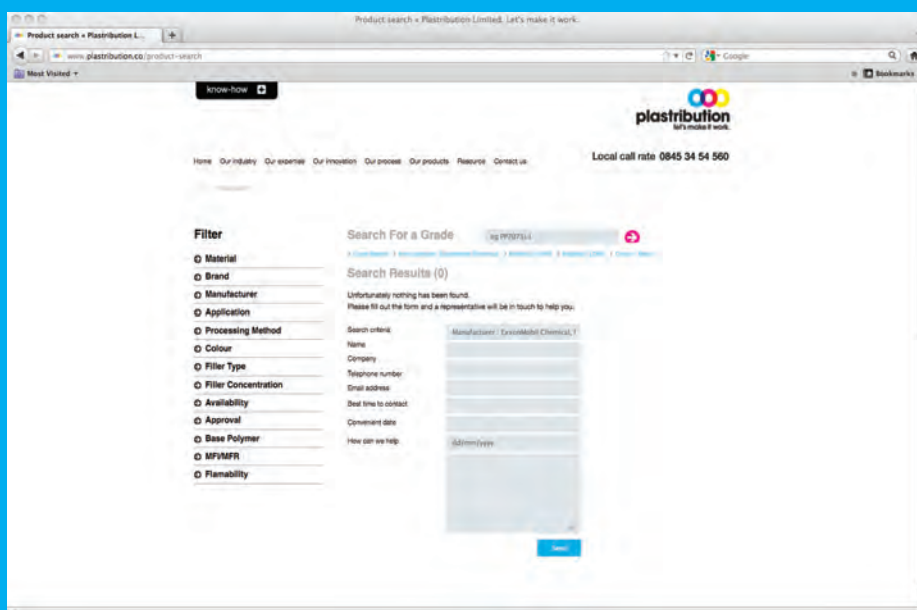

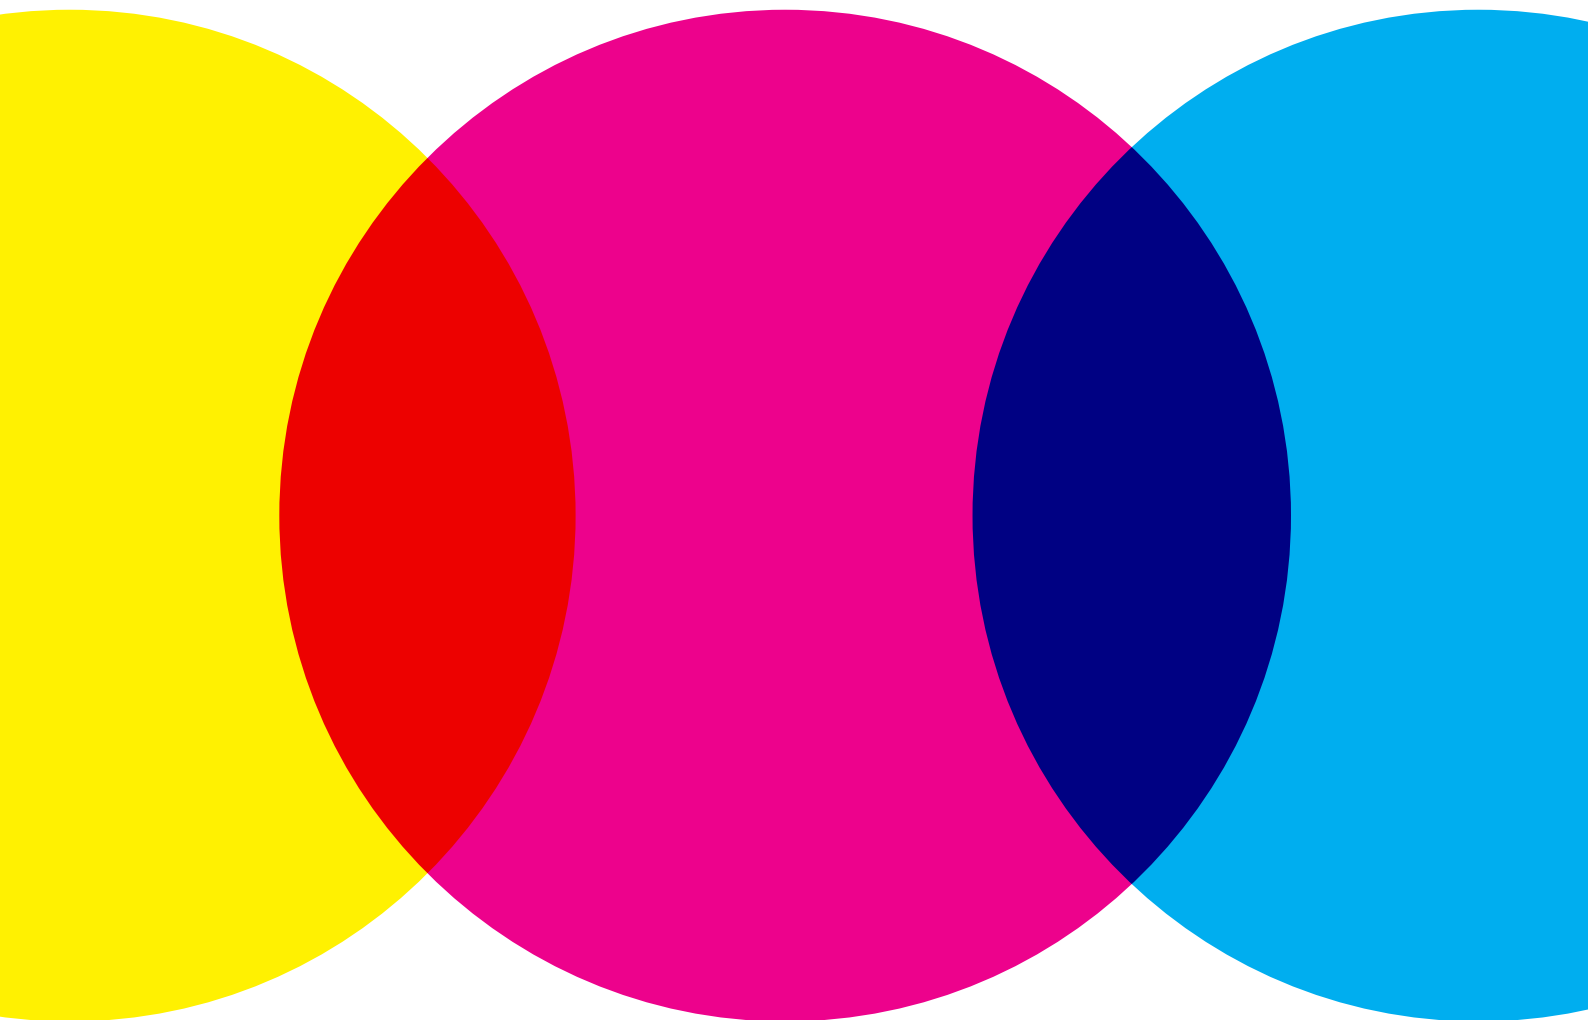

11. There is a 'crumb trail' at the top of the page where you can see where you are, and when you are ready even clear the search to look for other materials.

12. If what you are looking for is not in our database you will automatically have access to an enquiry form. Submit this or give us a call and we will be pleased to assist you further.
